Professional Summary

Computer Science graduate from the University of Central Punjab with hands-on experience in software development and technical community engagement. Passionate about web development and user-centered design, with proven experience contributing to technical initiatives and collaborative projects.

Key Skills

Programming: C++, Python, JavaScript | **Web:** HTML, CSS, React, Responsive Design | **Database:** SQL, CRUD, Relational Databases | **Core CS:** OOP, DSA, SDLC, APIs, HCI | **Tools:** Git/GitHub, Figma, Microsoft Office | **Soft Skills:** Communication, Leadership, Problem Solving, Teamwork | **Languages:** English, Urdu

Professional Experience

Olympia Chemicals Limited

July 2025 – Sep 2025

Software Engineering Intern

- Contributed to the full development lifecycle of an ERP system, including feature development, frontend styling with HTML, CSS, JavaScript and back-end logic implementation using C# and the ASP.NET MVC framework.
- Managed database connectivity and SQL fundamentals through ORM concepts to ensure efficient data handling and system reliability.
- Collaborated in testing, debugging, peer code reviews, and version control using Git/GitHub, applying design patterns to deliver reliable, maintainable software.

Student Member, IEEE and IEEE Computer Society

Dec 2024 – July 2026

Secretary, Vice President, President

- Supported the establishment and growth of the student chapter at UCP by planning and coordinating technical events, workshops, hackathons, and networking sessions in collaboration with faculty members, volunteers, and industry professionals.

Selected Projects

Protons EduVerse (Final Year Project)

Frontend Developer

- Contributed to the development of a study abroad platform integrating university discovery, scholarships, admission planning and document management using Next.js, React, TypeScript, and Tailwind CSS, building scalable, responsive interfaces and interactive workflows to deliver a production-ready user experience.

Blood Share

- Designed a mobile blood donation application in a team setting using Figma. Applied Human Centered Design principles to develop wireframes and interactive prototypes that simulate complete user workflows.

AI-SafaBlossoms

- Developed an interactive prototype for a UAE focused flower delivery app using Justinmind. Emphasized usability, visual hierarchy, and user journey mapping based on contextual user research.

Education

University of Central Punjab, Lahore

Oct 2022 – July 2026

Bachelor of Computer Science

CGPA: 3.07

Punjab College, Johar Town Campus, Lahore

2020 – 2022

FSc, Pre-Medical

Grade: A

Beaconhouse School System, Lahore

2018 – 2020
